Fluid Phase Equilibria, 85 (1993) 351–352
Elsevier Science Publishers B.V., Amsterdam

Contents Volume 85 (1993)

Statistical thermodynamics of disordered and ordered systems. A properly normalized local order theory
W. Wang and J.H. Vera (Montreal, Que., Canada) 1–18
Extension and evaluation of the chain-of-rotator group contribution equation of state for prediction of thermodynamic properties of polar and non-polar compounds
M.H. Shariat, F. Dehghany and M. Moshfeghian (Shiraz, Iran) ... 19–40
Accurate equation of state predictions at high temperatures and pressures using the existing UNIFAC model
H. Orbey, S.I. Sandler (Newark, DE, USA) and D.S.H. Wong (Taiwan, Taiwan, ROC) 41–54
A general algorithm for the calculation of azeotropes in fluid mixtures
R.G. Chapman and S.P. Goodwin (Sunbury-on-Thames, UK)..... 55–69
An equation of state for Lennard-Jones pure fluids applicable over a very wide temperature range
Y. Miyano (Okayama, Japan) 71–80
Modification and application of the mean spherical approximation method
J.-F. Lu, Y.-X. Yu and Y.-G. Li (Beijing, People's Republic of China) 81–100
Prediction of vapor–liquid and liquid–liquid equilibria and thermodynamic properties of multicomponent organic systems from optimized binary data using the Kohler method
P.K. Talley, J. Sangster, C.W. Bale and A.D. Pelton (Montreal, Que., Canada) 101–128
Calculation of equilibrium solubility of carbon dioxide in aqueous mixtures of monoethanolamine with methyldiethanolamine
M.-H. Li and K.-P. Shen (Taiwan, Taiwan)..... 129–140
Theory of infinite dilution chemical potential
E. Hamad (Dhahran, Saudi Arabia) and G.A. Mansoori (Chicago, IL, USA) 141–151
Vapor–liquid equilibria of binary mixtures of β-pinene with limonene and p-cymene at atmospheric pressure
M.G. Bernardo-Gil and M. Albertina Ribeiro (Lisbon, Portugal) .. 153–160
Liquid–liquid equilibria in hydrocarbon + 3-methoxypropionitrile systems, correlation and prediction
M. Antosik and S. Malanowski (Warsaw, Poland)..... 161–170
Infinite-dilution activity coefficients by comparative ebulliometry: five systems containing ethyl formate
A.S. Gonçalves and E.A. Macedo (Porto, Portugal)..... 171–179
Multiphase equilibrium behavior of the mixture ethane + 1-decanol + n-docosane
C.L. Patton and K.D. Luks (Tulsa, OK, USA)..... 181–190
Physicochemical model of solid–liquid solubilities using NMR measured equilibrium constants
T.K. McBride and J.F. Brennecke (Notre Dame, IN, USA)..... 191–215

Excess volumes of pentan-2-ol and 2-methylbutan-2-ol with some *n*-alkanes at 308.15 K
P. Bala, B.S. Mahl, H.K. Mahal and S.S. Bhardwaj (Ludhiana, India) 217–223
Liquid–liquid–vapour phase equilibria in the system methane + ethane + eicosane: retrograde behaviour of the heavy liquid phase
J. Gregorowicz, P.J. Smits, Th.W. de Loos and J. de Swaan Arons (Delft, The Netherlands) 225–238
Dielectric properties and modeling of supercooled aqueous mixtures of methylhydrazine and 1,1-dimethylhydrazine
M. Ferriol, M.Th. Cohen-Adad (Villeurbanne, France), L. Jorat, G. Noyel (Saint-Etienne, France) and J. Huck (Villeurbanne, France) 239–255
Solubility of hydrogen sulfide in isooctane, *n*-decane, *n*-tridecane, *n*-hexadecane and squalane at temperatures from 323 to 523 K and pressures up to 1.6 MPa
C. Yokoyama, A. Usui and S. Takahashi (Sendai, Japan) 257–269
Thermodynamic properties of 1,1-dichloro-1-fluoroethane (R141b)
D.R. Defibaugh, A.R.H. Goodwin, G. Morrison and L.A. Weber (Gaithersburg, MD, USA) 271–284
The solubility of two monoterpenes in supercritical carbon dioxide
M. Richter and H. Sovová (Prague, Czech Republic)..... 285–300
Phase equilibria in binary mixtures of propane and hexacontane
C.J. Peters, J.L. de Roo and J. de Swaan Arons (Delft, The Netherlands) 301–312
The virial coefficients and the equation of state behavior of the polar components chlorodifluoromethane, fluoromethane and ethanenitrile
A.M. Demiriz, R. Kohlen, C. Koopmann, D. Moeller, P. Sauermann, G.A. Iglesias-Silva and F. Kohler (Bochum, Germany) 313–333
Measurements on the phase behavior of binary mixtures for modeling the condensation behavior of natural gas. Part III. The system methane + hexadecane
M.P.W.M. Rijkers, C.J. Peters and J. de Swaan Arons (Delft, The Netherlands) 335–345

Corrigendum..... 347

Author index 349

Contents of Volume 85 (1993)..... 351–352
